ET Roller

Facts:

The compact, 20 inch, powder coated base is smaller than most IV pole bases.

Six 3 inch non-marking Mono Tech wheels reject debris and are excellent on both carpet and hard floors. The base has 3 locking and 3 non-locking wheels.

The standard center post is 48 inches tall.

An optional 60 inch center post is available for an additional fee.

The CJT adjustable device arm with a comfort grip knob makes height adjustment easy.

Depending the center post used the device arm attachment point adjusts from 6 inches up to 60 inches in height and the width extends from 17 inches to 24 inches.

When not in use, the arm may be locked into a stow position.

No tools are required to adjust the height, width or angle of the device arm.

The ET Roller can support a wide range of devices ranging from iPads to the Tobii-Dynavox I15 eyegaze device.

Description

The ET Roller, an “all new kind” of device stand combines a compact base, Mono Tech wheels and an adjustable device arm with comfort grip knob to make positioning your device a simple task.
