

PROFILER

One Mount, Endless Possibilities

For over 18 years, the Profiler has proven to be a powerful positioning tool and a durable mounting system. The Profiler is capable of withstanding the rigors of day-to-day use, while securely maintaining the position of the device, thus making it easier for an individual to access their device at all times.

The Profiler's unique design allows the mounting system to be adjusted to meet an individual's changing needs over time with zero to minimal costs. This makes the Profiler both a sound ergonomic choice and economic investment.

A versatile mounting system, the Profiler can attach to a wide variety of wheelchairs, walkers, and other adaptive equipment.

Benefits:

- Backed by the "CJT Helping Hand" support system
- Capable of virtually unlimited positioning on more than one plane
- Manufactured from high quality aircraft aluminum
- Durable and lightweight
- Attaches to either the left or right side without requiring special adaptations
- Works with virtually any communication device, laptop or tablet technology
- Easy to release from the base with the removal of the ball lock pin
- Easy to swing away and lock into position
